

### Assignment 1

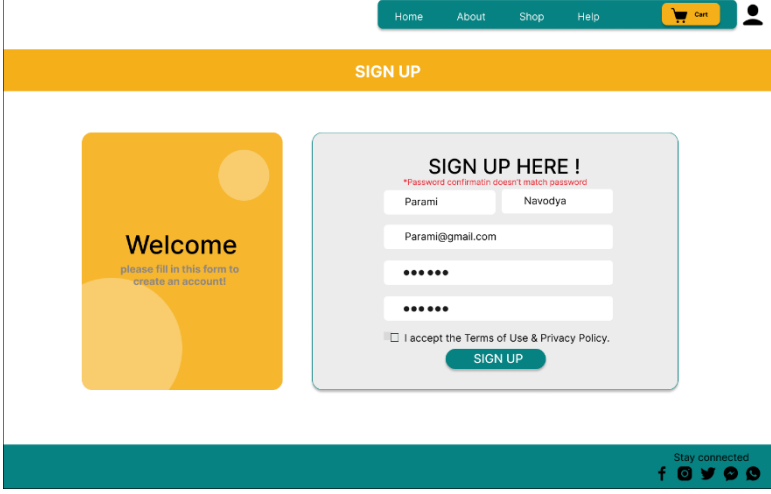

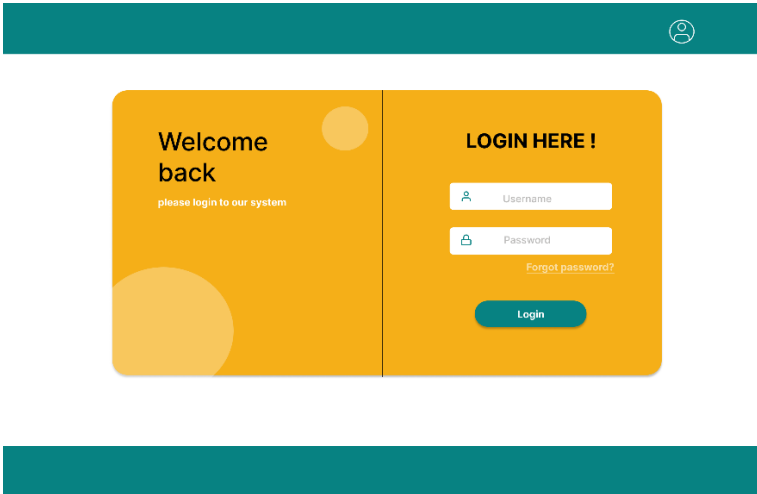

**SE3080 – SPM**
**Semester 2**

Group No:	SEJ009	
Brief description of the project	With the current situation in Sri Lanka and the busy lives of many people, it is very easy to get the required items in one place as a one-stop-shop and make online transactions. With that in mind, we decided to create this e-commerce solution. Anyone can easily get the cell phones, smart watches and accessories , cameras , head phones, tablets, drones etc. they need at any time from the one-stop shop and make the payment online or cash on delivery.	
INDIVIDUAL DETAILS OF GROUP MEMBERS		
Registration No	IT20631260	
Student Name	Jayathilaka S.A.D.R.P	
Function(s)	<u>Sprint 1</u> <ul style="list-style-type: none"><li>• Signup Page</li><li>• Sign In Page</li><li>• Customer Profile</li><li>• Edit Customer Profile</li></ul> <u>Sprint 2</u> <ul style="list-style-type: none"><li>• Payment Page</li><li>• Add to cart</li><li>• Delete Customer Profile</li><li>• Customer Admin Report</li></ul>	
Note: Include the functions required to complete for both sprint 1 & sprint 2		
Sprint 1	Picture of interface 1	Brief description of interface 1
		<p><b>Purpose:</b> The purpose of the interface is to register to the system as a customer.</p> <p><b>Flow:</b> initially the customer will arrive at the page for the first time and he will provide the necessary details and put the tic and click the sigh up button. If the customer's PW and the confirm PW isn't match, then there will be an error message as displayed below.</p>

### Assignment 1

SE3080 – SPM

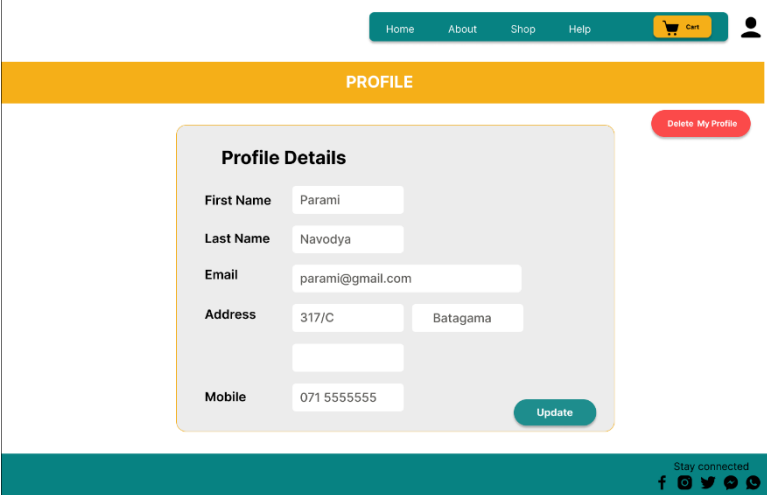

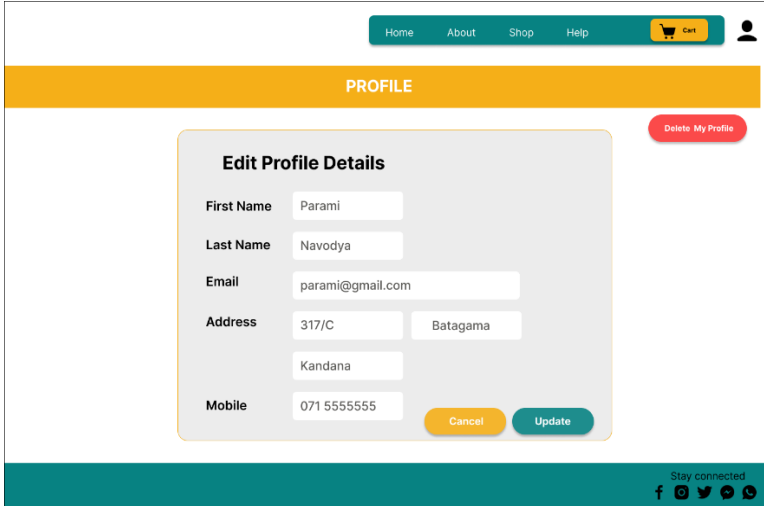

Semester 2

		<p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that force the user's attention directly to the function.</li> <li>• Title which gives the users an idea about the functionality of the interface.</li> <li>• Placeholders which provides the user an idea about respective input fields.</li> </ul>

SE3080 – SPM

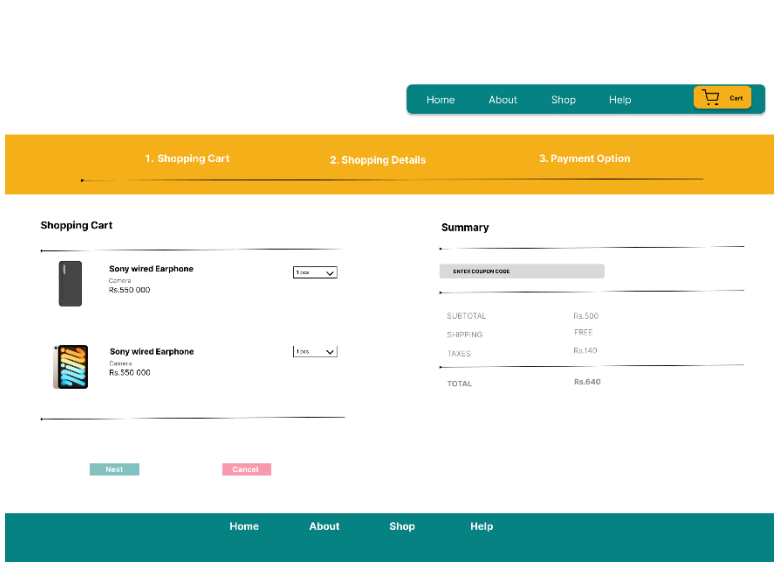

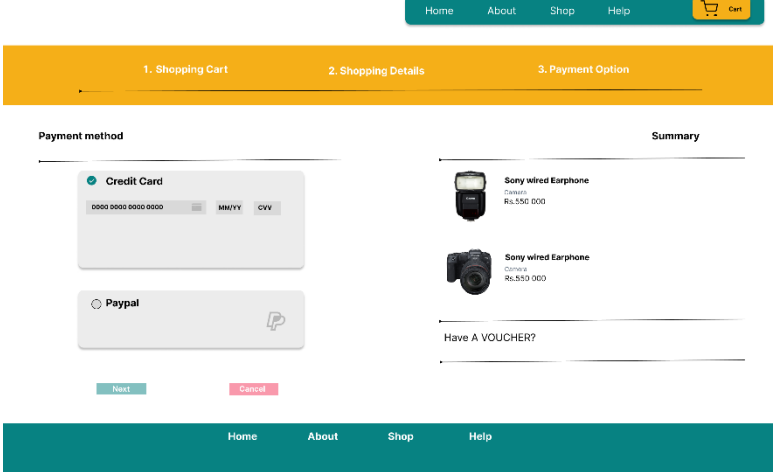

Semester 2

Sprint 2	<p><b>Picture of the interface_5</b></p> 	<p><b>Brief description of interface_5</b></p> <p><b>Purpose:</b> This interface has the purpose of providing the visual of the products that the user going to buy.</p> <p><b>Flow:</b> When you go to the product page choose the product that you like to buy and click the button “Add to Cart”. Once you did that the product will added to the cart.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic and uniform interface.</li> <li>• Easy to understand the details such as the quantity, and total price.</li> </ul>
	<p><b>Picture of the interface_6</b></p> 	<p><b>Brief description of interface_6</b></p> <p><b>Purpose:</b> The purpose of this page is to provide the space to input the payment details.</p> <p><b>Flow:</b> Once you finished selecting products user can click the next button. Then the user will redirected to this page. After that the user can provide the credit card details and pay the bill.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic and uniform interface.</li> <li>• Easy to understand the details such as the quantity, and total price.</li> </ul>

### Assignment 1

SE3080 – SPM

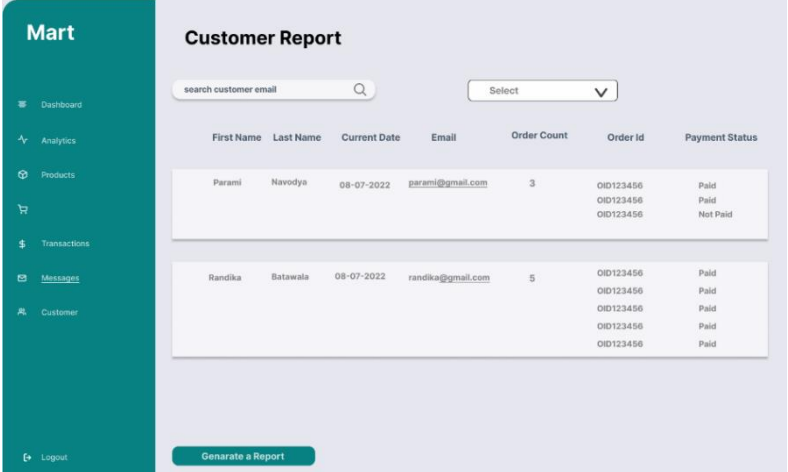

Semester 2

	Picture of the interface_7	Brief description of interface_7
		<p><b>Purpose:</b> Purpose of this interface is to delete the customer profile.</p> <p><b>Flow:</b> Once the customer goes to the profile page there will be a red button in right corner. If the customer click that button then there will be a pop up window asking the permission to delete the account. The customer can select weather to delete or not.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that force the user's attention directly to the function.</li> <li>• Title to the page saying what is supposed to do.</li> <li>• Very simple and easy way for the function that anyone can do.</li> <li>• There will be a popup window to prevent a user accidently delete his account.</li> </ul>

### Assignment 1

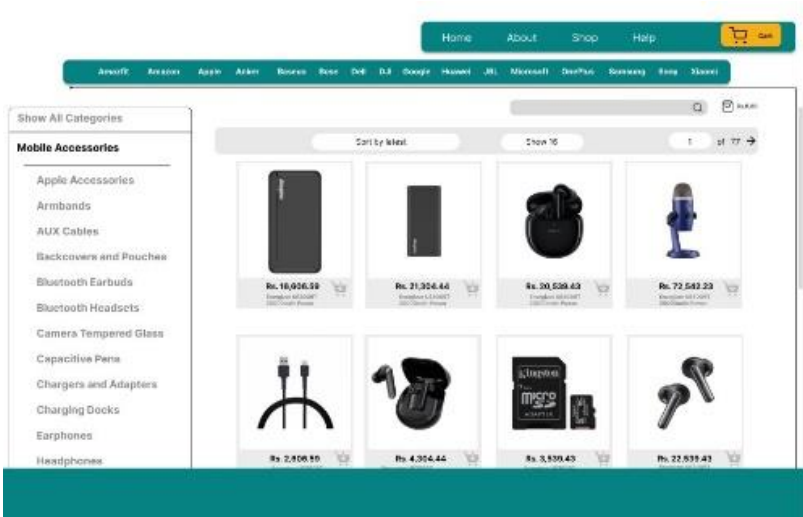

SE3080 – SPM

Semester 2

	Picture of the interface_8	Brief description of interface_8
		<p><b>Purpose:</b> This is an admin side interface that shows the customer and their orders and the order status.</p> <p><b>Flow:</b> Once the admin login to the system, under the customer and payment management he can find this interface. As default it gives all the customers data. Using the search bar admin can search using emails or some filters. Also the admin can get a report of the data using “generate a report” button.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that force the user’s attention directly to the function.</li> <li>• Title to the page saying what is supposed to do.</li> <li>• Very simple and easy way for the function that anyone can do.</li> </ul>

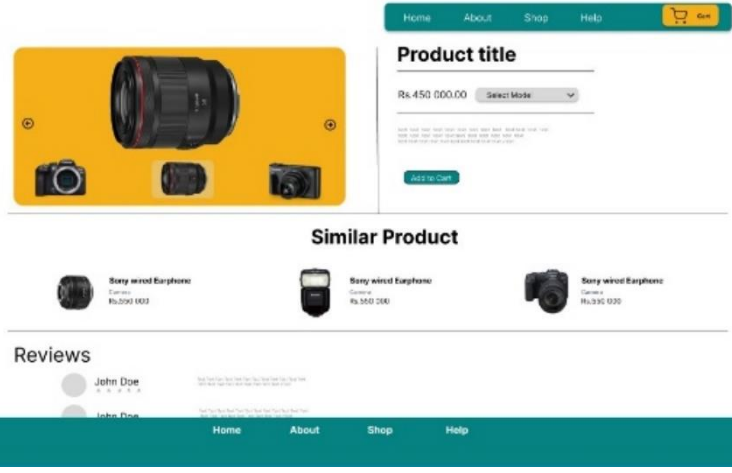

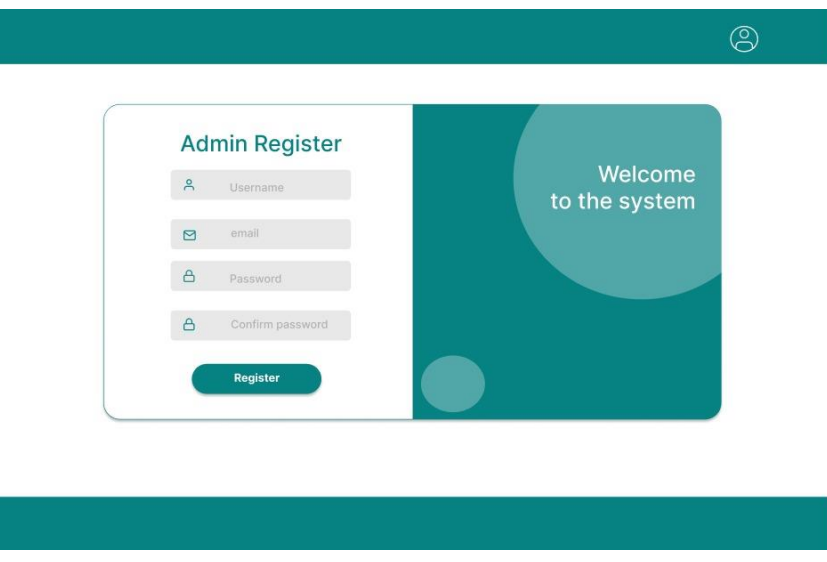

### Assignment 1

**SE3080 – SPM**
**Semester 2**

<b>Registration No</b>	IT20605902	
<b>Student Name</b>	Samarasinghe S.D	
<b>Function(s)</b>	<p><b>Sprint 1</b></p> <ul style="list-style-type: none"> <li>• All Products View</li> <li>• Product View</li> <li>• Admin Registration</li> </ul> <p><b>Note:</b> Include the functions required to complete for both <b>sprint 1</b> &amp; <b>sprint 2</b></p> <p><b>Sprint 2</b></p> <ul style="list-style-type: none"> <li>• Add product</li> <li>• Edit Product</li> <li>• View Product to admin</li> <li>• Product Report</li> </ul>	
<b>Sprint 1</b>	<p style="text-align: center;"><b>Picture of interface 1</b></p> 	<p style="text-align: center;"><b>Brief description of interface 1</b></p> <p><b>Purpose:</b> This interface will be used to show basic details of products and to allow product comparison that helps customers decide what to buy.</p> <p><b>Flow:</b> Initially customer have to login to the system and then he can view this page directly as home page. In this page customer can see all products with basic details or he can select any category as his preference or customer can search for what he wants.</p> <p><b>Good practices</b></p> <ul style="list-style-type: none"> <li>• Designed to be attractive to the user.</li> <li>• Simple design which focuses the user's attention directly to the content and non -technical language has used.</li> <li>• Icons which provide an intuition on to what it is supposed to do.</li> </ul>

### Assignment 1

**SE3080 – SPM**
**Semester 2**

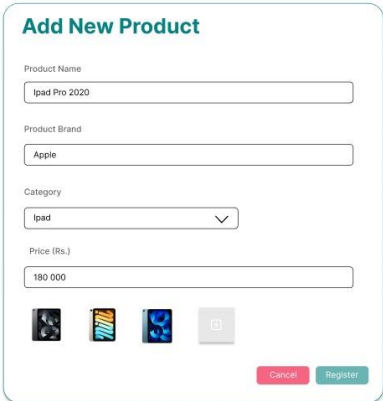

Picture of interface 2	Brief description of interface 2
	<p><b>Purpose:</b> The purpose of this interface is to show all the details of the selected product to the customer. Customers can view more images that are related to the selected product from this page.</p> <p><b>Flow:</b> Customer can navigate to this page by click on a product in home page and he can add relevant product to the cart. Bottom of the page customer can view similar products to that selected product and show reviews that has to selected product.</p> <p><b>Good practices</b></p> <ul style="list-style-type: none"> <li>• Simple design which contains all the necessary information and non-technical language has used. Have used images that are in good quality and focus user attention clearly.</li> <li>• Most needed information has highlighted with different font sizes.</li> <li>• Icons which provide an intuition on to what it is supposed to do.</li> </ul>
Picture of interface 3	Brief description of interface 3
	<p><b>Purpose:</b> The purpose of the system is to register as an admin to the system</p> <p><b>Flow:</b> The admin will navigate to this interface by clicking register now in the login interface (or any other method). After navigating, the admin will initially provide the User name, email, PW and confirm their password. If PW and confirm PW is not matching an error will be prompted. After entering the information, register button can be pressed and it will navigate the user to their dashboard.</p>

### Assignment 1

SE3080 – SPM

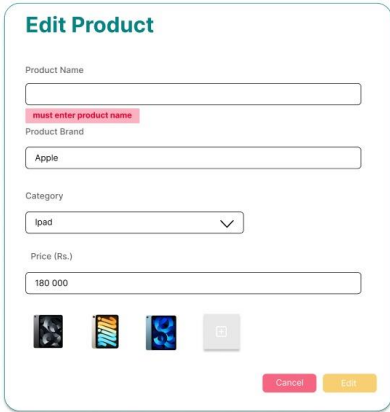

Semester 2

		<b>Good practices:</b> <ul style="list-style-type: none"> <li>• Simplistic and uniform interface</li> <li>• Title which gives the user an idea about the functionality of the interface.</li> <li>• Placeholder and icons which provides the user an idea about the respective input fields.</li> <li>• Password and confirm PW checking whether they match and providing feedback.</li> </ul>
<p><b>Sprint 2</b></p>	<b>Picture of the interface_5</b>	<b>Brief description of interface_5</b>
		<p><b>Purpose:</b>          The purpose of the interface is to edit the product by the admin (admins are not allowed to register to the system. When adding admins to the system, only the basic fields such as the UN, Email, Password are provided). By clicking add product, admin can add all the other relevant details.</p> <p><b>Flow:</b>          The admin will navigate to this interface by clicking the respective buttons in their dashboards. The Product name and Brand name are normal text boxes. The price field will validate whether the entered string matches the price format. If the any field appear empty an error will be prompted. after that and upload a picture of them by clicking upload icon. The progress bar will show the status of the upload when the file is uploading. After entering the information or editing, the relevant button can be pushed to add the product information.</p> <p><b>Good practices:</b></p>

### Assignment 1

**SE3080 – SPM**

**Semester 2**

		<ul style="list-style-type: none"> <li>• Simplistic and uniform interface</li> <li>• Title which gives the user an idea about the functionality of the interface.</li> <li>• Placeholder and icons which provides the user an idea about the respective input fields.</li> <li>• Each field checking whether they match and providing feedback.</li> </ul>
	<b>Picture of the interface_6</b>	<b>Brief description of interface_6</b>
		<p><b>Purpose:</b>  The purpose of the interface is to edit the product by the admin (admins are not allowed to register to the system. When adding admins to the system, only the basic fields such as the UN, Email, Password are provided). By clicking edit product, admin can add all the other relevant details and edit information in the future.</p> <p><b>Flow:</b>  The admin will navigate to this interface by clicking the respective buttons in their dashboards. After navigating to the interface, the user will enter the relevant information or edit the already existing information in the system. The Product name and Brand name are normal text boxes. The price field will validate whether the entered string matches the price format. If the any field appear empty an error will be prompted. after that and upload a picture of them by clicking upload icon. The progress bar will show the status of the upload when the file is uploading. After entering the information or editing, the relevant button can be pushed to edit the product information.</p>

### Assignment 1

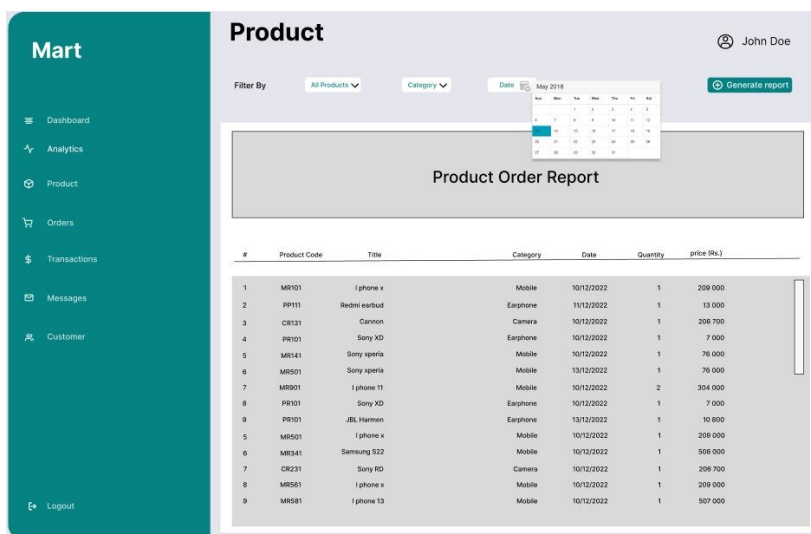

SE3080 – SPM

Semester 2

- **Good practices:**  
Simplistic and uniform interface
- Title which gives the user an idea about the functionality of the interface.
- Placeholder and icons which provides the user an idea about the respective input fields.
- Each field checking whether they match and providing feedback.

Picture of the interface\_7

Brief description of interface\_7

#	Product Code	Title	Category	Date	Quantity	price (Rs.)
1	MR101	I phone x	Mobile	10/12/2022	1	209 000

Student Name	Batawala B.A.R.P.R	
Function(s)	<p><b>Sprint 1</b></p> <ul style="list-style-type: none"> <li>• Create feedback category page.</li> <li>• Add/ view/ edit/ delete functions in feedbacks part.</li> <li>• View/ edit / delete functions in feedback part on admin view.</li> <li>• Search function in feedback part.</li> <li>• Generate report in feedback part.</li> </ul> <p><b>Sprint 2</b></p> <ul style="list-style-type: none"> <li>• Add/ view/ edit/ delete functions in complaints part.</li> <li>• View/ edit / delete functions in complaint part on admin view.</li> <li>• Search function in complaint part.</li> <li>• Generate report in complaint part.</li> </ul>	
Note: Include the functions required to complete for both sprint 1 & sprint 2		
Sprint 1	Picture of interface 1	Brief description of interface 1
		<p><b>Purpose:</b> The purpose of this interface is categorize feedback function according to customer view.</p> <p><b>Flow:</b> When customer logs into the system he can simply click on feedback button in the home page feedbacks and reviews section.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that focuses the user's attention directly to categories of the function.</li> </ul>

### Assignment 1

SE3080 – SPM

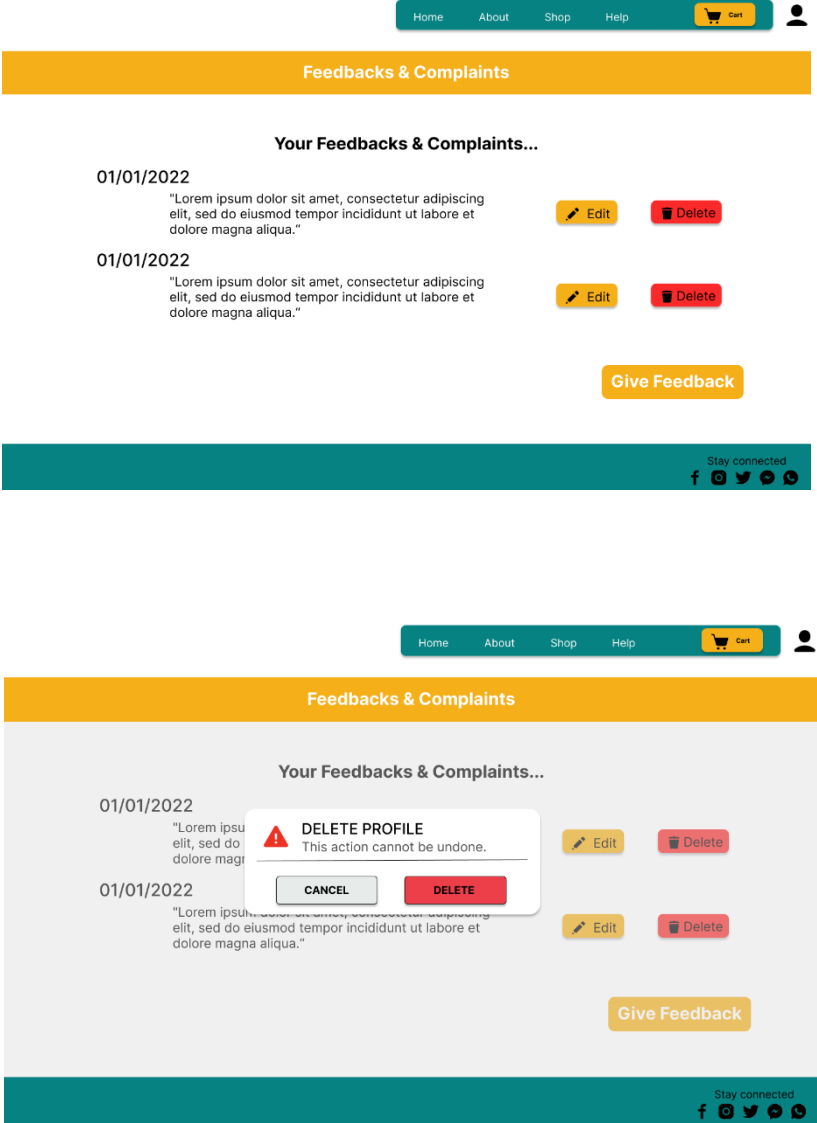

Semester 2

	Picture of interface 2	Brief description of interface 2
		<p><b>Purpose:</b> This interface allows the customer to provide feedback and reviews about services and products that are provided from our website.</p> <p><b>Flow:</b> The customer will navigate to the feedback page and click on the ‘Give Feedback’ button or customer can navigate to ‘Your Feedbacks’ page and click on the ‘Give Feedback’ button. Then customer have to provide some contact details and rate our services. If customer have any suggestions or comments they can type it on the provided space and submit form.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Give Your Feedback title which gives the purpose of the interface.</li> <li>• Place holders and labels which direct the customer to the relevant input fields.</li> <li>• Email field will give feedback if the format of the field is incorrect.</li> <li>• By using calendar icon all customers can easily input date in same format.</li> </ul>

### Assignment 1

SE3080 – SPM

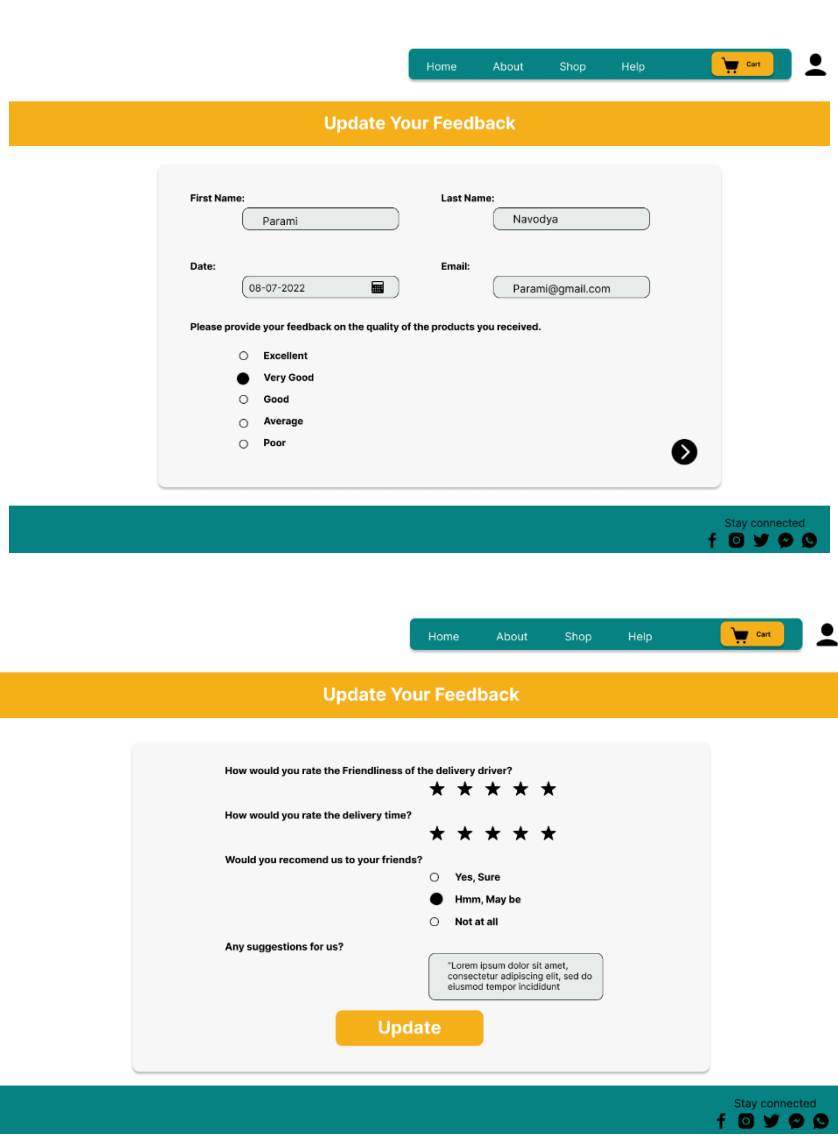

Semester 2

	Picture of interface 3	Brief description of interface 3
		<p><b>Purpose:</b> This interface allows customer to view their own feedbacks and complaints.</p> <p><b>Flow:</b> The customer will navigate to the feedback page and click on the 'Your Feedbacks and Complaints' button. From this page customer can easily delete or edit their own comments by click on 'Edit' or 'Delete' buttons or can easily navigate to the 'Give Feedback' page.</p> <p>When customer click on the Delete button system shows warning message to confirm that customer wants to delete that feedback surely.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that focuses the user's attention directly to the function.</li> <li>• Give delete or cancel options that customer may need.</li> <li>• Clearly inform user about the action he may take.</li> <li>• User can easily navigate to other pages he may need.</li> </ul>

### Assignment 1

SE3080 – SPM

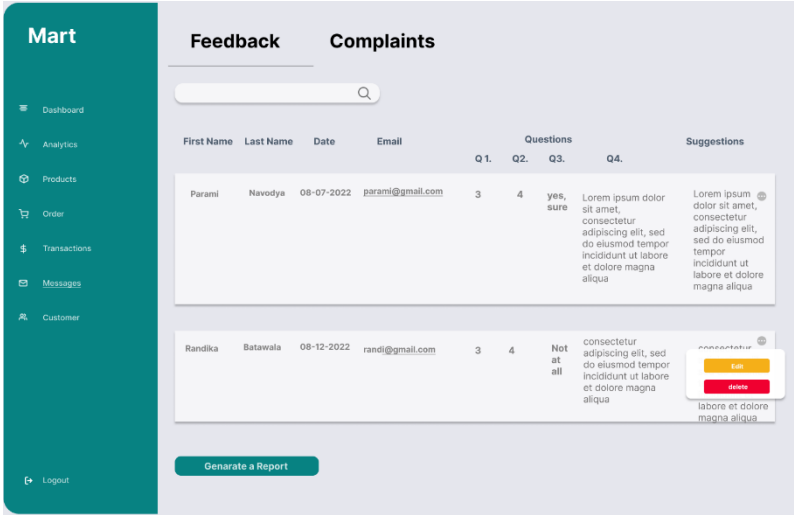

Semester 2

	Picture of interface 4	Brief description of interface 4
		<p><b>Purpose:</b> This interface allows customer to edit their feedback.</p> <p><b>Flow:</b> Customer will navigate to their own feedbacks page. By clicking on the edit button in the relevant feedback they can navigate to this page. When customer view this page he can see questions with his previous answers and customer can edit those answers and submit their response.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Update Your Feedback title which gives the purpose of the interface.</li> <li>• Email field will give feedback if the format of the field is incorrect.</li> <li>• By using calendar icon all customers can easily input date in same format.</li> </ul>

### Assignment 1

SE3080 – SPM

Semester 2

	Picture of the interface_5	Brief description of interface_5
		<p><b>Purpose:</b></p> <p>This interface allows admin to view customer feedbacks as a table and he can edit or delete relevant feedback from the system. It is also possible to generate reports and search feedbacks.</p> <p><b>Flow</b></p> <p>: The admin will navigate to the admin dashboard. Then he can select feedback and complaint management or admin can easily click on messages in the side bar and click on feedbacks in top of the page.</p> <p>Admin can view customer feedbacks and he can edit or delete relevant feedback by click on the Edit or Delete button in the last column.</p> <p>And Admin can search feedbacks by using search bar on top of the page. If admin wants to generate a report from feedbacks, he can simply click on generate a report button and generate the report.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simple but dynamic interface.</li> <li>• Icons providing an intuitive experience</li> <li>• Designed to be attractive to the user.</li> </ul>

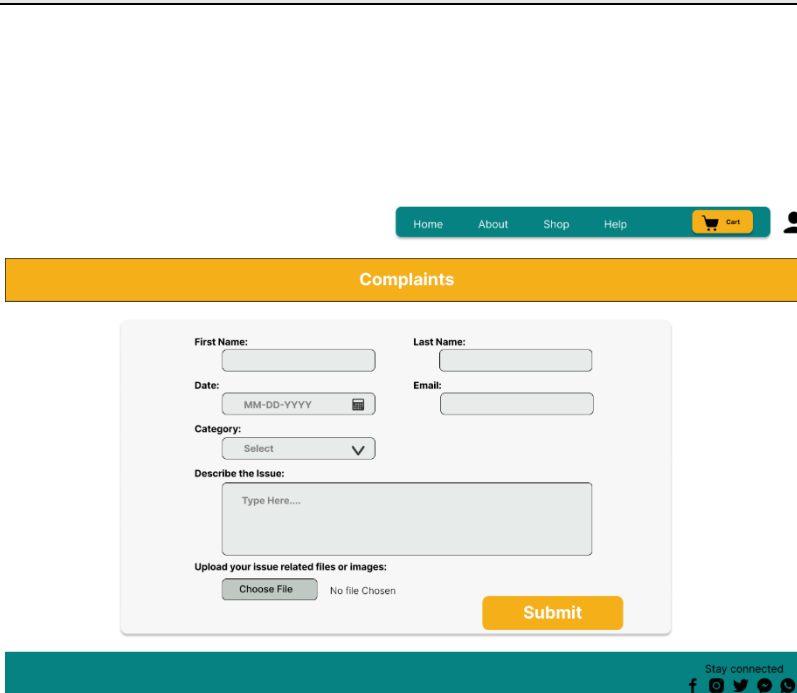

### Assignment 1

SE3080 – SPM

Semester 2

Sprint 2

Picture of the interface\_6

Brief description of interface\_6

#### Purpose:

This interface allows the customer to provide complaints about services and products that are provided from our website.

#### Flow:

The customer will navigate to the feedback page and click on the 'Complaints' button.

Then customer have to provide some contact details, select complain category as service, delivery, quality of the products or select other as category. Customer can describe his issue in given space and If customer have any files or images related to the issue he can upload that files and submit the document.

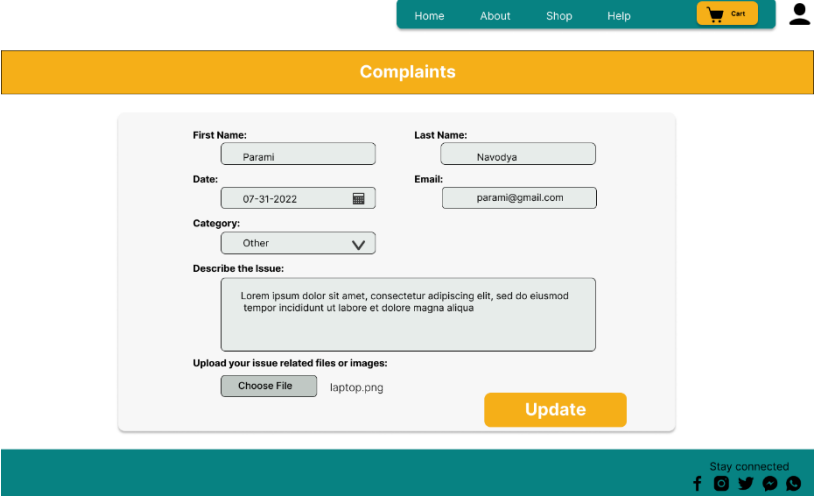

#### Good practices:

- Place holders and labels which direct the customer to the relevant input fields.
- Email field will give feedback if the format of the field is incorrect.
- Category field is a drop down so that admin can quickly get the idea about the complaint when he received the message.
- By using calendar icon all customers can easily input date in same format.

### Assignment 1

SE3080 – SPM

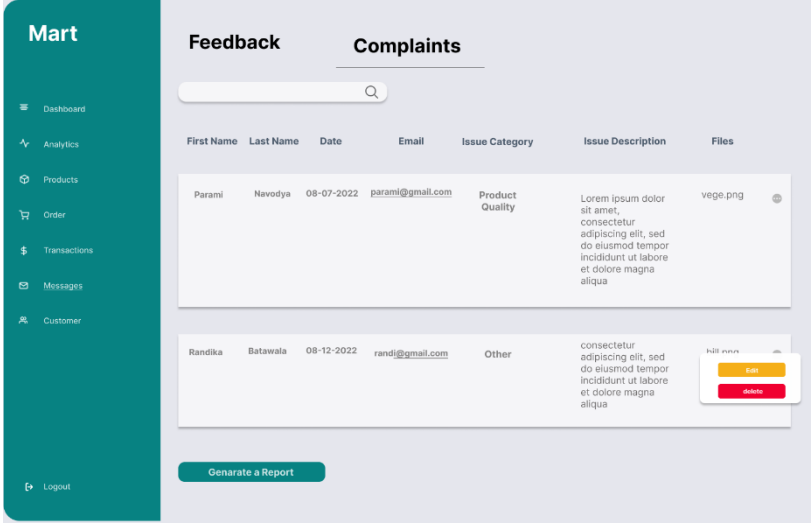

Semester 2

	Picture of the interface_7	Brief description of interface_7
		<p><b>Purpose:</b> This interface allows customer to edit their Complaints.</p> <p><b>Flow:</b> Customer will navigate to their own feedbacks page. There is also an opportunity to get the relevant details directly by Delivery Date.</p> <p>Having given the opportunity to generate the report.</p> <p><b>Good practices:</b></p> <ul style="list-style-type: none"> <li>• Simplistic design that focuses the user's attention directly to the function.</li> <li>• There is an opportunity to get the relevant details directly by the delivery date through the view delivery report interface.</li> <li>• In addition, a search bar has been developed:</li> <li>• Having given the opportunity to generate the report</li> </ul>

### Assignment 1

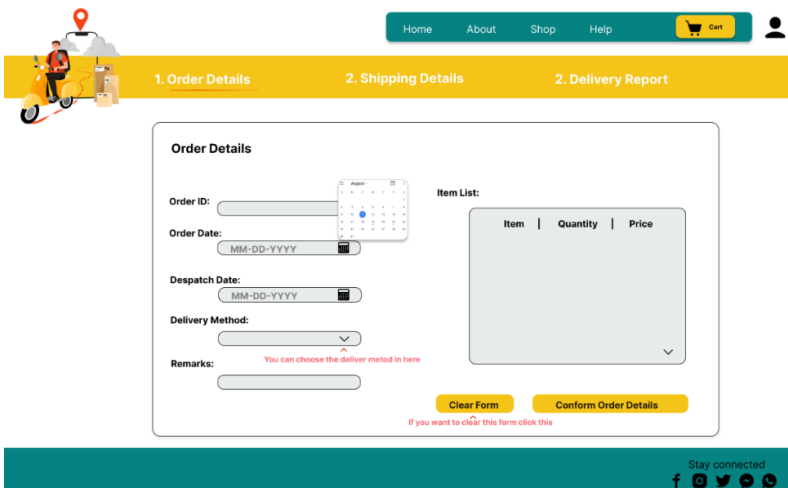

SE3080 – SPM

Semester 2

Picture of the interface\_9

The screenshot shows a web interface for a delivery report. At the top, there is a navigation bar with links: Home, About, Shop, Help, and a Cart icon. Below the navigation bar is a yellow progress bar with three steps: 1. Order Details, 2. Shipping Details, and 2. Delivery Report (the current step). The main content area is titled 'Delivery Report' and contains the following form fields:

- Driver Name:** Two input fields with values 'Lashen' and 'Nimanthu'.
- Receiver Name:** Two input fields with values 'Randika' and 'Batavala'.
- Receiver Phone Number:** An input field with value '0729864683' and a red text label 'Ex: 072-35678910'.
- Delivery Date:** A date picker showing '08-11-2022'.
- Delivery Time:** A time picker showing '04:20' and a dropdown menu set to 'PM'.
- Delivery Status:** A section with four radio button options: 'Delivery completed on time' (selected), 'Delivery Completed but Delayed', 'Delivery not Completed', and 'Other'.

At the bottom right of the form is a yellow 'Next >' button. Below the form is a teal footer bar with social media icons and the text 'Stay connected'.

INTERFACE 9 :Edit Delivery Report

Brief description of interface\_8

#### Purpose:

The purpose of the interface is edit delivery report.

#### Flow:

Admin can edit delivery report details. Here you can edit the form. After editing, when you click the 'Edit form' button, it will be edited correctly and the edited data will be added to the database.

#### Good practices:

- Simplistic design that focuses the user's attention directly to the function
- Having a button to edit details.
